company profile

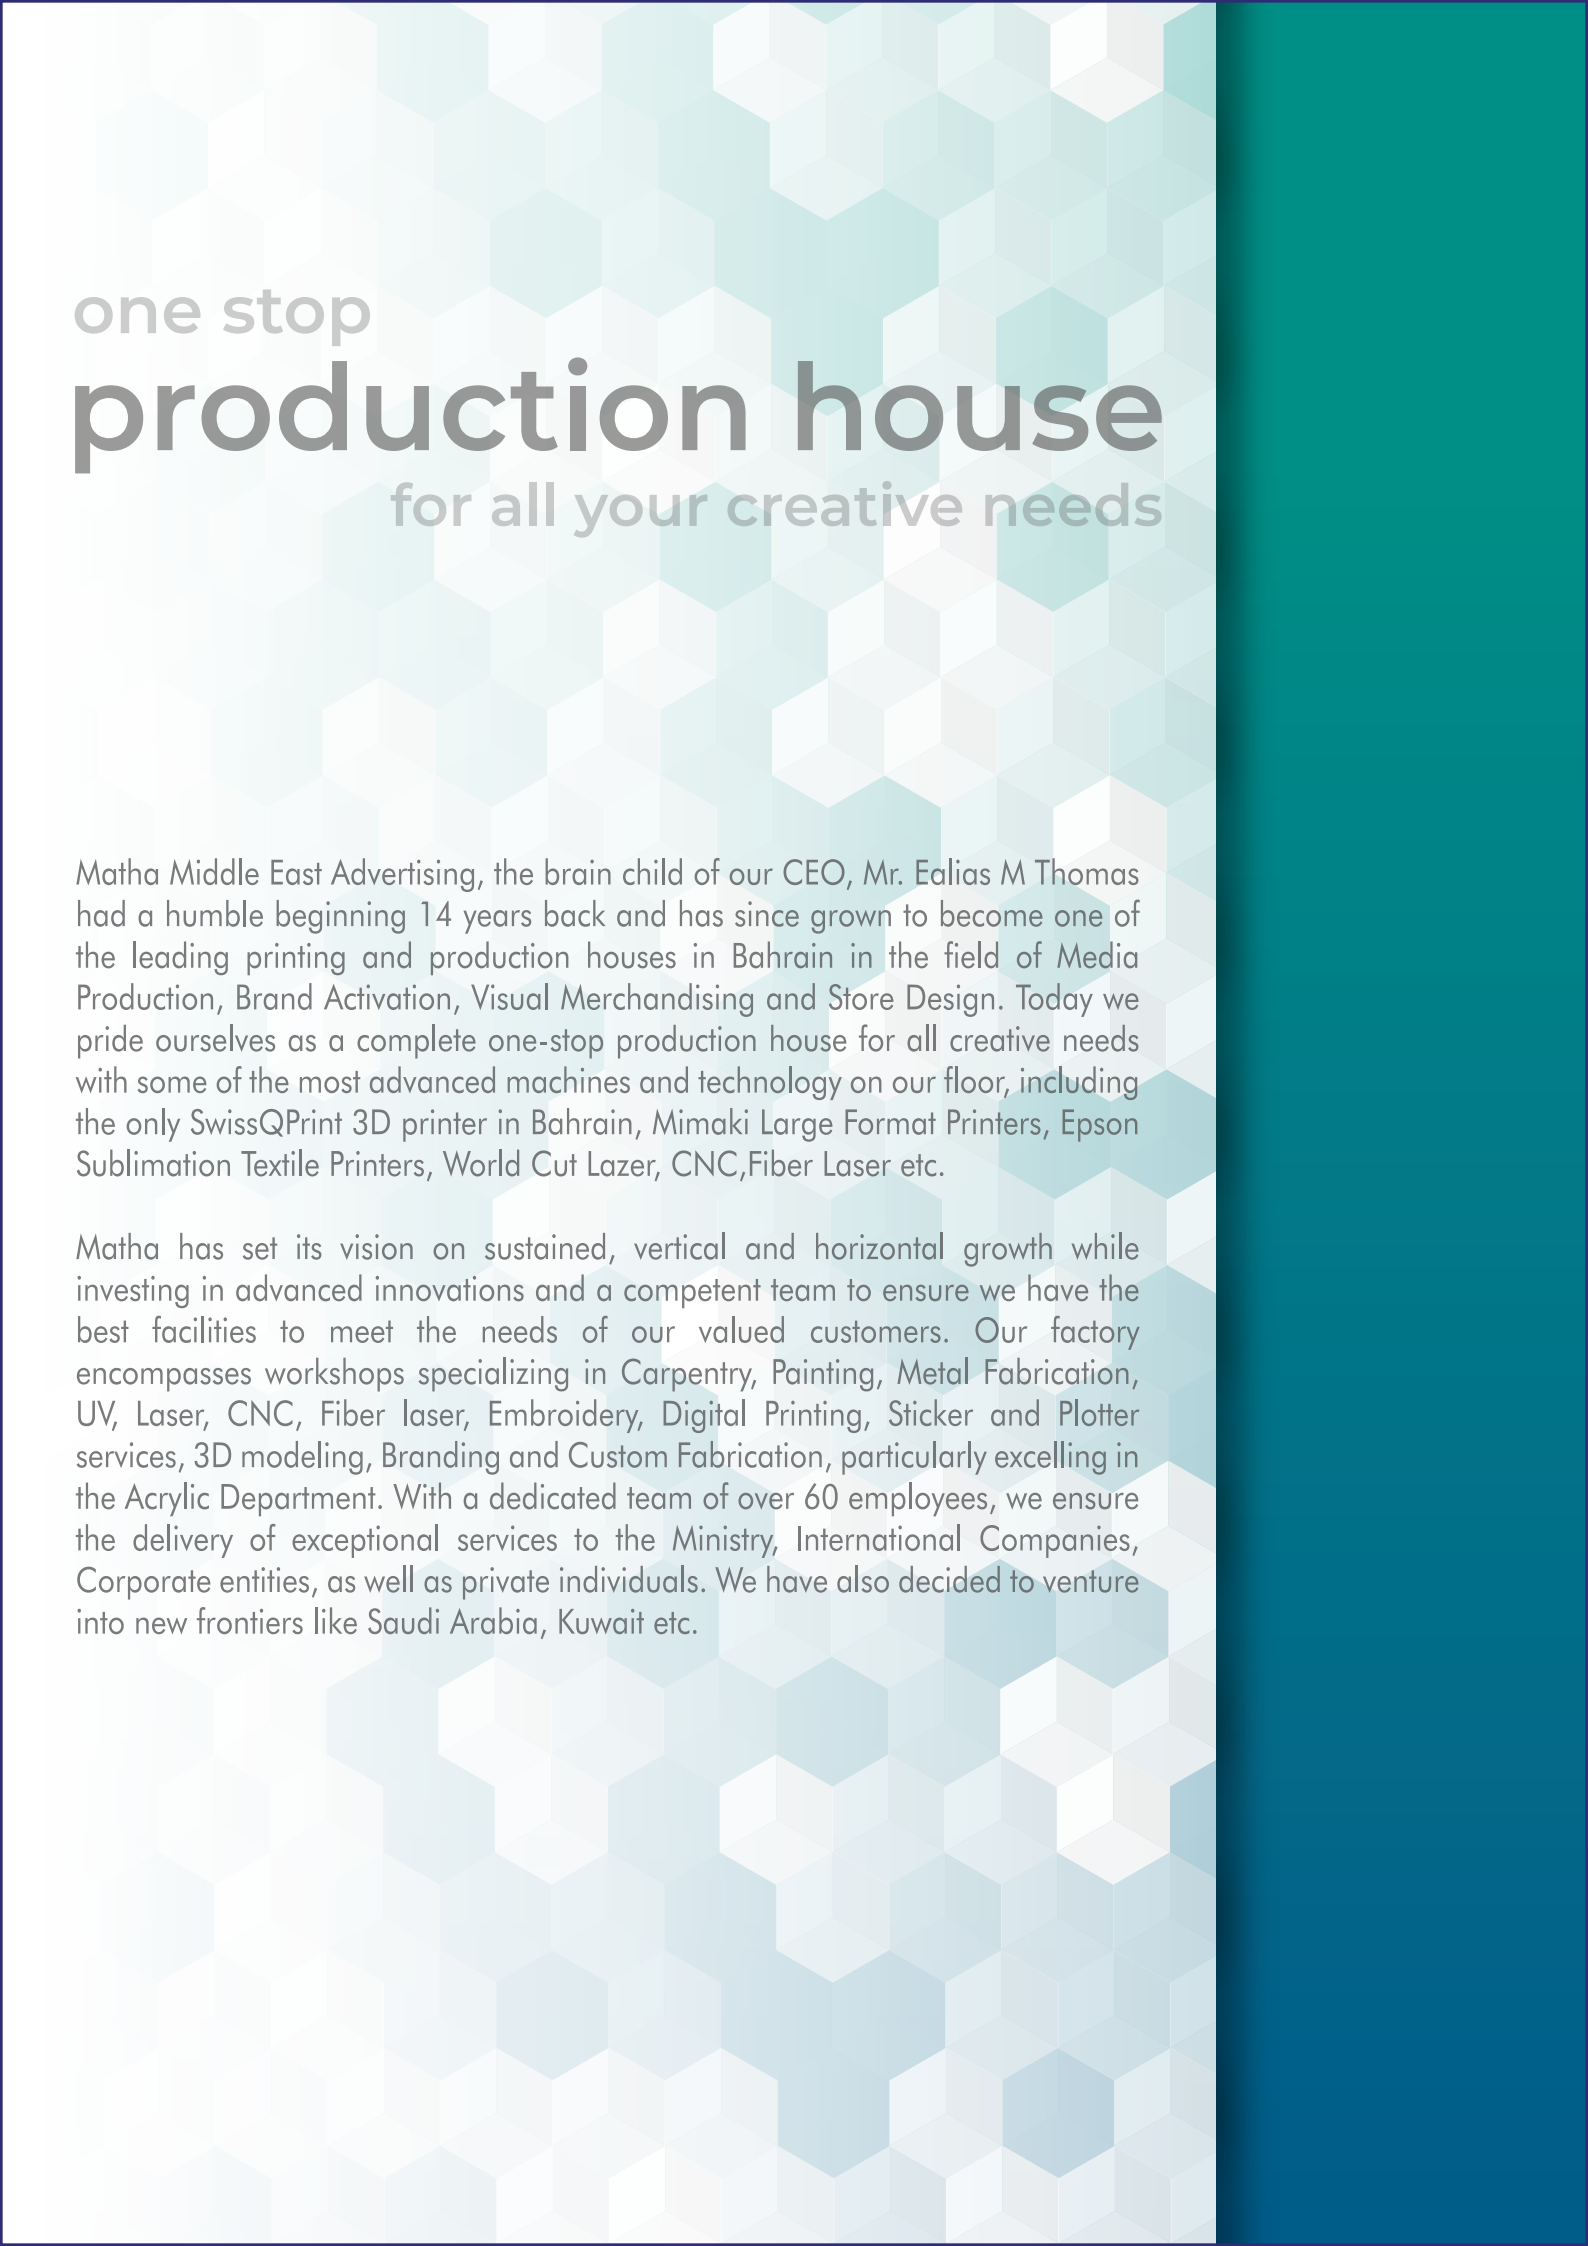

Ealias M Thomas

managing director

Meet our visionary CEO, a charismatic and commanding leader with a mature outlook and versatile approach. After living in Mumbai for a decade, he receded from India to The Kingdom of Bahrain where he ventured into the international corporate space by establishing his own company. Known for his solid work ethic and determination, he has gained invaluable experience in various departments, including printing press, acrylic, laser and UV printing technologies. Notably, he has honed his expertise in Acrylic Modules, solidifying his manual mastery in this field.

Striking a harmonious balance between establishing a clear hierarchical structure and fostering a collaborative and collegial atmosphere, our CEO is a long-term thinker driven by goal-setting and achievement. He possesses an overarching vision for the organization and is responsible for implementing daily strategies while aligning employees with long-term goals. Success is paramount to him, and he cherishes the feeling of accomplishment, whether in significant milestones or small victories. He firmly believes that choice, not chance, determines one's destiny.

With our CEO at the helm, we are poised for greatness, guided by his exceptional leadership and unwavering commitment to success.

one stop production house

for all your creative needs

Matha Middle East Advertising, the brain child of our CEO, Mr. Ealias M Thomas had a humble beginning 14 years back and has since grown to become one of the leading printing and production houses in Bahrain in the field of Media Production, Brand Activation, Visual Merchandising and Store Design. Today we pride ourselves as a complete one-stop production house for all creative needs with some of the most advanced machines and technology on our floor, including the only SwissQPrint 3D printer in Bahrain, Mimaki Large Format Printers, Epson Sublimation Textile Printers, World Cut Lazer, CNC, Fiber Laser etc.

Matha has set its vision on sustained, vertical and horizontal growth while investing in advanced innovations and a competent team to ensure we have the best facilities to meet the needs of our valued customers. Our factory encompasses workshops specializing in Carpentry, Painting, Metal Fabrication, UV, Laser, CNC, Fiber laser, Embroidery, Digital Printing, Sticker and Plotter services, 3D modeling, Branding and Custom Fabrication, particularly excelling in the Acrylic Department. With a dedicated team of over 60 employees, we ensure the delivery of exceptional services to the Ministry, International Companies, Corporate entities, as well as private individuals. We have also decided to venture into new frontiers like Saudi Arabia, Kuwait etc.

SOME OF OUR

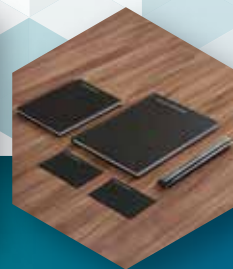

CLIENTELE

swissQprint

This large format printer offers the speed solution for impressive mega posters, yet also produces crisp backlits. It delivers print results of a high standard, adapted to functional quality requirements, at a consistently fast tempo. Acrylic, aluminium composite panels, wood, banners, polyester, polycarbonate, polystyrene, PVC, flexible foam panels, glass and metal - all routine work with swissQprint. Printing on difficult, heat-sensitive materials such as textiles, films and paperboard is equally stress-free.

Printing Size: 3.2 x 2 meters

FIRST TIME IN
BAHRAIN

The JV150-160 printer from Mimaki provides high performance, creativity and versatility with vibrant ink types, including new orange and light black, for sign making, display graphics etc. Gamut-extending eco-solvent inks and variable drop technology enables us to accomplish anything from fine art reproduction to vehicle wraps and more. Or the dye sublimation inks help create vibrant textiles and soft signage. Fast printing speeds up to 56.2 m² per hour with high quality resolution of up to 1440 dpi.

FLAT BED
UV LED

world cut

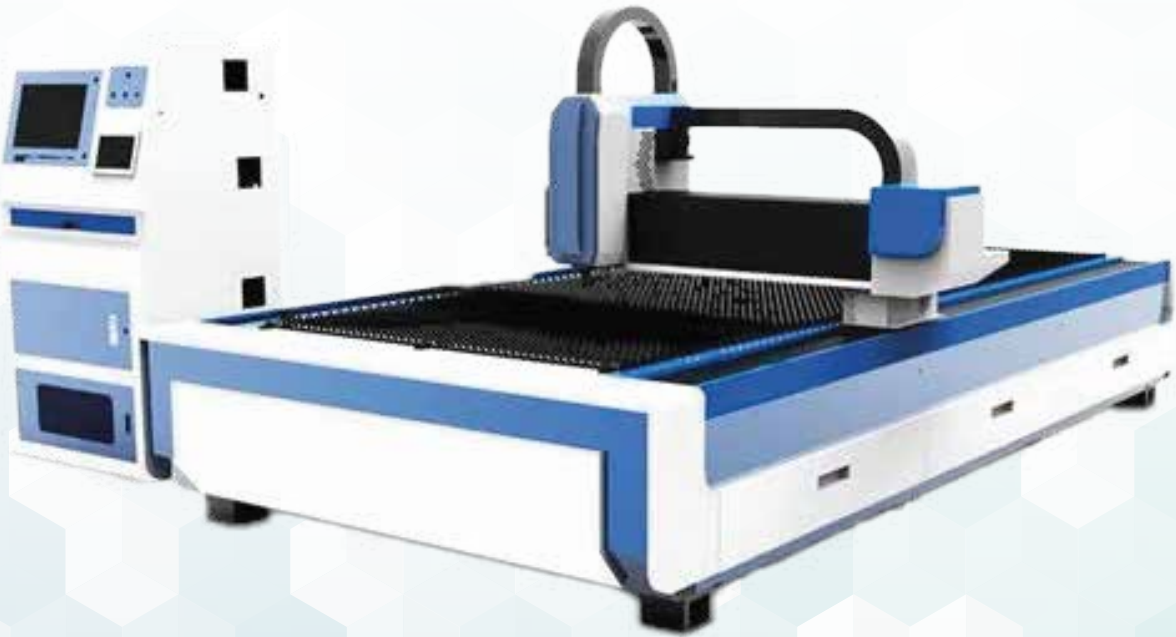

Fixed with important high quality laser tube with a long lifetime stable quality. The machine is the most cost effective mixed metal and nonmetal laser cutting machine in the market. With powerful cutting capability, the machine can cut mild steel, stainless steel, mirror stainless steel, galvanized steel, electrolytic galvanized steel, wood, acrylic etc.

Working Area: 1250 x 2500 mm / 1500 x 3000 mm

LASER

Fiber laser cutting is one of the latest developments in laser cutting technology, offering unprecedented speed and accuracy. Fiber laser cutting uses a type of solid-state laser to melt and pierce metals, achieving a precise and efficient cut. The laser medium for this technology is optical fiber, as opposed to gas or crystal, giving fiber laser cutting its name. A fiber laser cutting machine is extremely useful in cutting sheet metal including carbon steel, stainless steel, copper, brass, aluminum and titanium.

FIBER
LASER

SWF E SERIES Plus is the latest Multi-Head Automatic Embroidery Machine from SWF. The machine includes a 6.4 inch high-resolution LCD control panel. The SWF Automatic Embroidery Machine is designed for applying embroidery to fabric and other similar materials. The machine itself allows to simply upload a digital image and within a few touches of its intuitive touch screen, its ready to start.
